

0681 72 1st Warm Springs Oregon Sept 25
Sept 25. All well. No E P Roberts of the Ladies names from my
Crest Episcopalian Am. Soc in St. Michaels. He organized a Union St.
of Penneville last Sabbath and expects to organize one of our first front
next Sunday. He gave me some of his papers last evening. He is a good man
but not much here. Mrs. Sawyer & I both have had various offers for
business the other. To keep from being bored at breakfast. The
Penneville next says that very thing that can make her a being gathered and
down off and products that they will be high another year. Well, that is our very
with a feeling sent by a Union from the penneville.

Dear My Love

I was not disappointed in my
hope of getting a letter from you today. I think we both were
feeling about our blues - about the same time last Sunday.
I wish you were here. Have often wished it and that you had
not gone back. If you had have been here you could have had
many pleasant rides. I more particularly wish now you were
here as we are expecting Dr. Dochester & perhaps his wife.
They may be here tomorrow. I rec'd a letter from Rev M Bude
written last Friday in which he says he saw Dr. D the
day before I presume at the State Fair, and Dr. said he expected
to leave Portland Monday the 22 for Warm Springs.
Mr M B said she might be with him and if so they
would come in a private conveyance. It is very likely they
are at Seaside tonight. I presume you ^{will be} glad you are
not here. All I dread is about your being absent. but hope to
make this satisfactory. I saw in the Penneville news that
J J Smith the popular merchant at Sisters has a new

clerk. He arrived last Wednesday at the residence of Judge Summers. Thus far every one of your women friends in a similar condition, has had a favorable termination & you should be encouraged. I certainly hope and pray that thus it may be. I have spent a part of the last two days in getting up an affidavit regarding your land entry, the nature of the soil &c, also a certificate which Mr. Querey has signed as to what he knows of the land &c and have written a letter to Senator Mitchell to present the matter to the proper officers. I have kept duplicate copies. I demand just a patent & if this cannot be given then a refunding of the ⁷⁰⁰\$. Mrs. Querey called to my mind that they had once written to Mr. Kernan about our getting back this money and he had answered that there was no law for such refunding. There ought to be in such cases. Any had it would do any harm to make a fuss about it, and it may do some good. Today we tore down all the wire in the square & rolled it up & took out the posts that held it.

Jay Querey came near having an eye put out last evening and we concluded it was time to take it away. The barb cut quite a gash in the lower eyelid near the upper edge. He looks like he had been in a fight. Is all right though. We have put in new desks in the school rooms and are moving the rest into the boys old sitting room and are going to fix up the Williams' house for the boys sitting, wash and bath rooms. No more scholars. We learned the Indians were many of them on their way home from hop picking. Good night and sweet dreams
Ever your loving husband,
