1993 WA. COUNTY BIRTH DATA

KEY POINTS ★

OVERALL TRENDS:

Significant growth in public assisted/self-pay ("PA/SP") births, up 50% since 1989, compared to a 17% growth rate for all county births since 1989.

MOTHERS' CARE:

PA/SP moms are lagging behind county totals in the following areas:

- a) Adequate Prenatal Care: >5 visits
97% of county moms are classified adequate whereas 93% PA/SP moms.
- b) Trimester Prenatal Care Began -
lagging behind both county and state averages, with more frequent entry into care in the 2nd and 3rd trimesters

MOTHERS' DATA:

Alarming high incidence of unmarried patients and those with less than 12 years of education compared to county and state averages.

BABIES:

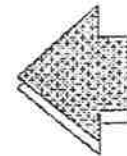

A very encouraging statistic however is the birthweight record for 1993. PA/SP babies were about even with state and county averages, however there are pockets of concern in all areas of the county.
